

International Economic and Technology Cooperation Assistance Available from the MOEA

1. Name of Organization:

Water Resources Agency (WRA), MOEA

2. Service Items:

- (1) Rainwater harvest promotion strategy and technology
- (2) Promotion of “Smart Saver Logo”
- (3) Integrated management of rural water drainage systems

3. Description:

- (1) The WRA has successfully promoted rainwater harvest systems to institutions and industrial circles. Related promotional strategies and technology could be introduced to other countries.
- (2) The promotion of “Smart Saver Logo” products has functioned well in Taiwan. The standards and design of “Smart Saver Logo” products could be introduced to other countries.
- (3) In the coming years, water drainage in coastal rural areas of Taiwan will be planned and managed in a systematic and comprehensive fashion. An integrated approach combining environmental engineering and reconstruction based on our extensive experience will be used to decrease the damage caused by torrential rainfall.

4. Implementation Methods:

- (1) The standards, research reports and case information of rainwater harvest could be provided to other countries. Assistance in planning, designing, and constructing of rainwater harvest system also could be supplied.
- (2) Export Taiwan’s experience in promoting the “Smart Saver Logo” system to other countries.
- (3) Countries in need of assistance in integrated management of rural water drainage system can send specialists to

Taiwan for training or we can send specialists to provide aid abroad.

5. Past Cases:

- (1) The Taipei Zoo has set up a rainwater harvest system with a 900-ton holding capacity for landscaping, animal, toilet, and maintenance use. It also installed poster boards and held “The Water Cycle” activity to introduce rainwater use.
- (2) “Smart Saver Logo” standards for faucets, washing machines, toilets, shower nozzles and urinals have been established.

6. Contact Information:
