

CPC geologist takes part in Taiwan-French TCP

Ms. Ku, a geologist working for CPC Corporation, Taiwan, took part in a training course titled “Sustainable Energy: Exploring and Assessing New Opportunities in Conventional Hydrocarbon Fields” at the French Institute of Petroleum in suburban Paris June 4-12, 2016, under the Taiwan-France Technical Training Program (TCP).

The institute’s stated mission is to develop, through industrial innovation and training, clean and economically viable technologies in the fields of energy, transport and the environment. It aims to facilitate the transfer of knowledge and expertise between research agencies and industry
