

Taiwan Water Corp. engineer takes part in Taiwan-French TCP

Ms. Chang, an engineer at Taiwan Water Corporation (TWC), took part in a training course on water utility and water loss management held by SUEZ Environment in France July 28 to Aug. 16, 2016.

While in France for the project under the Taiwan-French Technical Cooperation Program (TCP), Chang visited SUEZ Environment's meter testing and calibration laboratory as well as a range of other facilities and organizations.

SUEZ Environment is an international institute that provides environmental resources solutions. It offers technical training in asset and water loss management. The program is useful for improving water loss management strategies.

The Water Loss Reduction Program (2013-2022) is a major program being carried out by the TWC. The main strategies under the program include district metering area establishment, as well as leak detection and repair.
