
Building Efficiency Accelerator - Asia LEDS Partnership's Community of Practice on Building Energy Efficiency

Session 4: Energy Benchmarking to realize improved Energy Efficiency in Buildings

Date: September 1, 2020

Time: 11:00 am – 12:30 pm Bangkok time/ 9:30 am – 11:00 am New Delhi time

Location: <https://attendee.gotowebinar.com/register/4534329187361435152>

Energy benchmarking can help cities to use building energy information to assess performance and to design and implement policies and programs for energy efficiency improvements in existing buildings. Benchmarking data can also support setting locally appropriate targets for new buildings. The fourth web session of the Building Energy Efficiency (BEE) Community of Practice (CoP) will highlight opportunities that energy benchmarking offers to cities to advance building efficiency. Experiences and insights from benchmarking efforts from the region, including India and China, will be shared with participants to support replication of similar initiatives.

Session Agenda

- Welcome (5 mins) – Asia LEDS Partnership
- Benchmarking to enable building energy performance improvements at scale- Saket Sarraf, ps Collective, India (10 mins)
- Building energy performance benchmarking experiences from the region - Carolyn Szum, Lawrence Berkeley National Laboratory (10 mins)
- Benchmarking case studies from Kochi and Nagpur, India – Dhilon Subramanian, World Resources Institute – India and Nikhil Kolsepatil, ICLEI South Asia (15 mins)
- Open discussion by CoP members (45 mins)
- Discussion on next steps (5 mins) –Asia LEDS Partnership
